

Automobile Engineering Interview Questions with Answers Pdf

1. Piston compression rings are made of

- a. cast iron
- b. steel
- c. aluminium
- d. bronze

Ans: A

2. Automobiles gears are generally made of

- a. Brass
- b. cast iron
- c. stainless steel
- d. alloy steel

Ans: D

3. For lubrication of which part of an automobile only grease is used

- a. transmission
- b. steering system
- c. axle drive
- d. tie rod

Ans: D

4. The term master cylinder is associated with

- a. engine
- b. lubrication system
- c. cooling cylinder
- d. braking system

Ans: D

5. Which of the following can be used for starting a 1000 hp diesel engine?

- a. battery
- b. shunt motor

- c. small petrol engine
- d. compressed air

Ans : D

6. Speedometer drive is usually taken from

- a. dynamo
- b. fan belt
- c. flywheel
- d. front wheel

Ans: D

7. Odometer is

- a. an instrument which indicates the condition of the battery
- b. an instrument used for measurement of liquid consumption
- c. an instrument for BP measurement
- d. an instrument for distance measurement

Ans: D

8. Automobile radiator is filled with

- a. Alkaline water
- b. acidic water
- c. hard water
- d. soft water

Ans: D

9. The speed of the engine is increased or decreased by operating

- a. throttle valve
- b. choke valve
- c. steering
- d. clutch

Ans: A

10. Which of the following hydrocarbon has ring structure?

- a. Paraffin
- b. Olefin
- c. Diolefin
- d. Naphthene

Ans: D
