

Brain Teasers Interview Puzzles Questions with Answers Pdf

Questions : 1

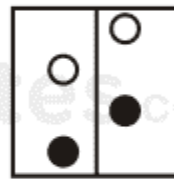

Which is the missing square?

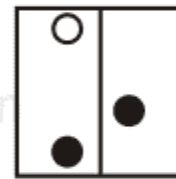

A

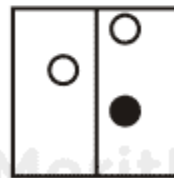

B

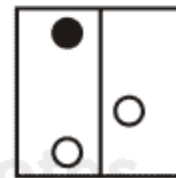

C

D

E

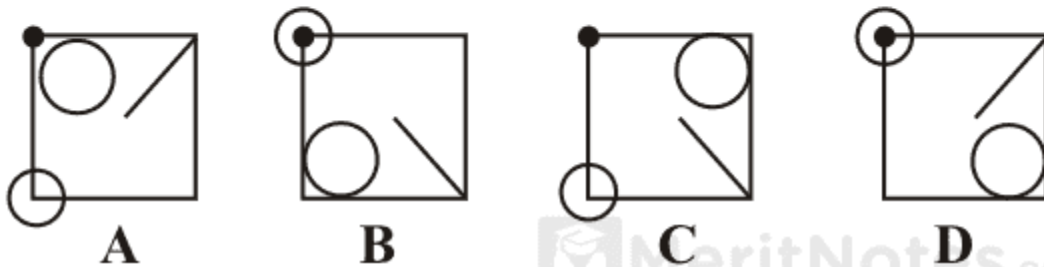

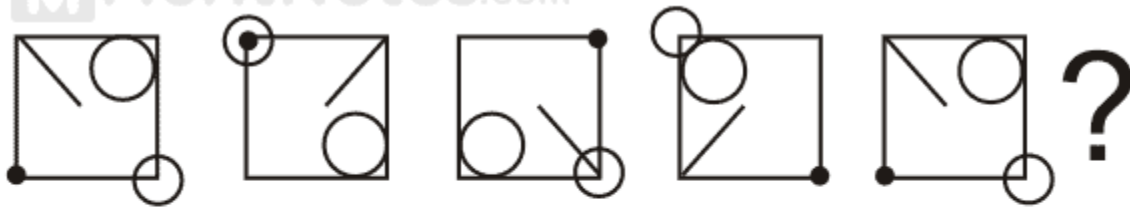

F

Ans: E

Looking across and down, two white circles in the same position in the first two squares equals a black circle in the same position in the third square, and vice versa; but black and white in the same position equals a blank in the third square.

Questions : 2

What comes next?

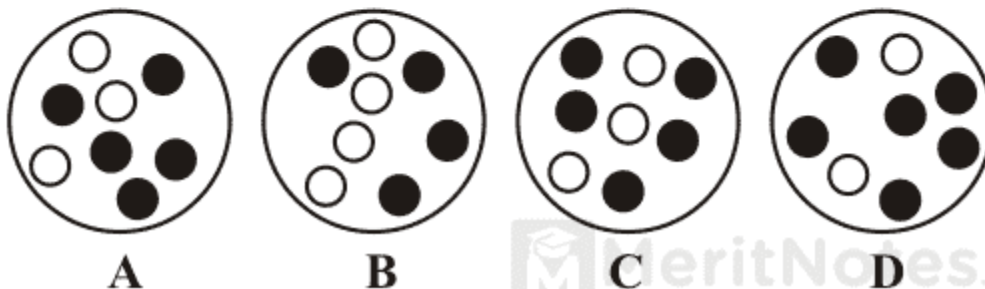

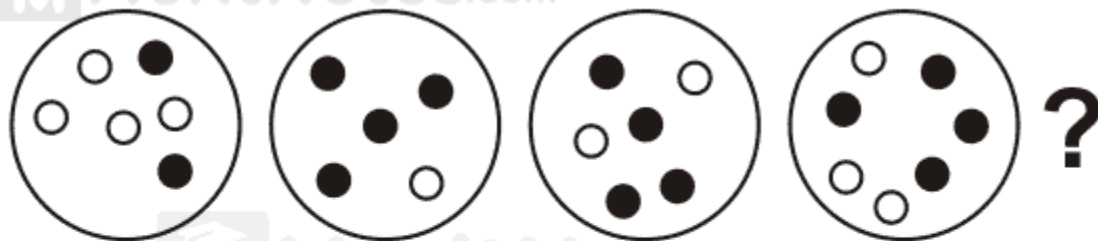

Ans: D

The diamond next to the end always moves to the front and the diamond third from the front always moves to the end.

Questions : 3

What comes next?

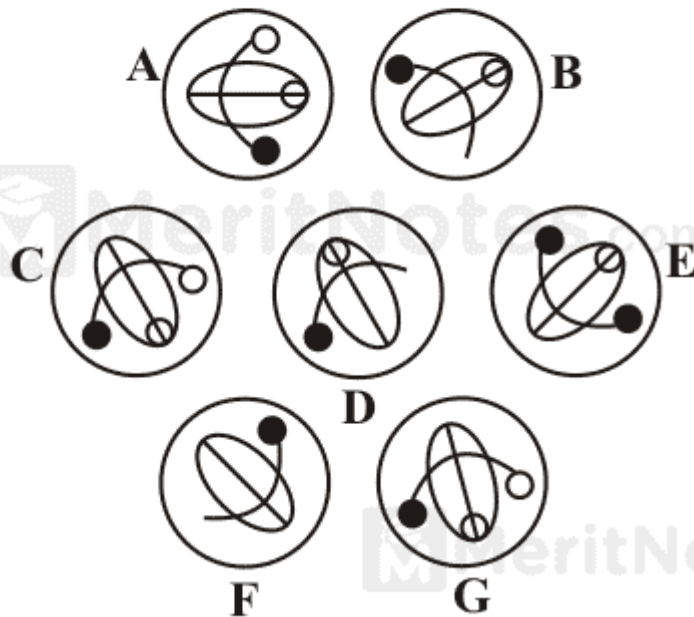

Ans: B

Black dots are worth two points and white dots one point. The score progresses 8 - 9 - 10 - 11.

B is thus valued at 12. A and C are 13 and D is 14.

Questions : 4

Which is the odd one out?

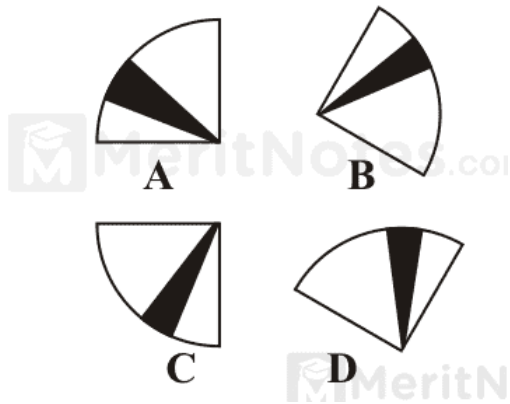

Ans: F

A and G are the same, as are C and E, and B and D.

Questions : 5

Which is the odd one out?

Ans: D

The rest are the same figure.
