CAD-CAM Objective Type Questions with Answers Pdf

1. The use of transistors in computers started in the decade commencing

a. 1940

b. 1950

c. 1960

d. 1970

Ans: B

2. What two disciplines are usually tied by a common database?

a. Documentation and geometric modeling

b. Drafting and documentation

c. Computer aided design and computer aided manufacturing

d. testing and analysis

Ans: C

3. Which device does the general population associate most with automation?

a. Flexible manufacturing

b. Robots

c. Numerical control machine

d. Computer graphics work station

Ans: B

4. Group technology brings together and organizes

a. common parts, problems and tasks

b. automation and tool production

c. documentation and analysis

d. parts and simulation analysis

Ams: A

5. CAD/CAM can find application in

a. shop floor control

b. material requirements planning

c. automated drafting

d. all of the above

Ans: D

6. Which of the following is not a part of CAD hardware?

a. graphic display terminal

b. keyboards

c. computer program

d. peripheral equipment

Ans: C

7. Computer used in CAD/CAM are

a. analog computers

b. digital computers

c. super computers

d. simple computers

Ans: B

8. Which of the following is non-volatile?

a. magnetic core storage

b. semi conductor storage

c. semi conductor monolithic storage

d. all of the above

Ans: A

9. Laser beam storage involves

a. metal film strip

b. carbon strip

c. magnetic drum

d. magnetic tape

Ans: A

10. COBOL is mainly used for

a. teaching of use of computers

b. business data processing

c. interactive purposes

d. general purpose programming language

Ans: B
