

Chemical Engineering Environmental Engineering Quiz Questions

Question: 1

Inorganic impurities causing water pollution is

- (A) protein
- (B) salts and minerals
- (C) carbohydrates
- (D) fats

Ans: B

salts and minerals

Question: 2

Which of the following is not a secondary air pollutant?

- (A) sulphur dioxide
- (B) ozone
- (C) photochemical smog
- (D) all a, b and c

Ans: A

sulphur dioxide

Question: 3

Which of the following gases has the least impact on global warming?

- (A) carbon dioxide
- (B) methane

(C) nitrous oxide

(D) carbon monoxide

Ans: D

carbon monoxide

Question: 4

Green house effect refers to increase in

(A) carbon monoxide

(B) atmosphere pressure

(C) greenery

(D) global temperature

Ans: D

global temperature

Question: 5

The burning of fuel containing trace amounts of chlorine cannot emit which pollutant?

(A) carbon monoxide

(B) furans

(C) dioxins

(D) hydrogen chloride

Ans: A

carbon monoxide
