Computer Fundamental Question Paper with Answer Pdf

Question: 1

_____ is defined as the science of selecting and interconnecting hardware components to create computers that meets functional, performance and cost goals.

(A) Calculating machine

(B) Computer architecture

(C) Calculator

(D) Computer

Ans: B

Computer architecture

Question: 2

The ALU makes use of _____ to store the intermediate results.

(A) Accumulators

(B) Heap

(C) Registers

(D) None of these

Ans: A

Accumulators

Question: 3

Which are used to overcome the difference in data transfer speeds of various devices?

(A) Buffer registers

(B) Multiple buses

(C) Bridge circuits

(D) Speed enhancing circuitry

Ans: A

Buffer registers

Question: 4

A type of instruction that produce several lines of machine language code is a

(A) Assemble

(B) Macro

(C) Address

(D) Mnemonic

Ans: B

Macro

Question: 5

Which is not the example of special purpose computer?

(A) Multimedia computer

(B) Word Processor

(C) Automatic Aircraft Landing

(D) All of the above

Ans: B

Word Processor
