

1. What is the role of ICANN?

The internet as a whole does not have a single controller. But the internet society, which is voluntary membership organization, takes the responsibility to promote global information exchange through the internet technology. Internet Corporation for Assigned Names and Numbers (ICANN) administers the domain name registration. It helps to avoid a name which is already registered.

2. Explain URL?

Every web page has a unique address called the Uniform Resource Locator or URL. The URL locates the pages on the Internet.
