

Computer Organization and Architecture Pdf

Question: 1

Which of the following statements correctly describes the microcomputer disk drive?

- (A) A disk drive is used to transfer data to and from disks.
- (B) The two types of disk drives are hard disks and flexible disks.
- (C) Hard disks are permanent storage devices.
- (D) All of these

Ans: D

All of these

Question: 2

RAM chips

- (A) Store data indefinitely unless you delete it
- (B) Allow the computer to store data electronically
- (C) Are always measured in thousand of bytes
- (D) All of these

Ans: B

Allow the computer to store data electronically

Question: 3

The CPU and memory are located on the

- (A) Keyboard
- (B) Graphics board
- (C) Sound board
- (D) Motherboard

Ans: D

Motherboard

Question: 4

The brain of any computer system is

- (A) CPU
- (B) Memory
- (C) ALU
- (D) Control unit

Ans: A

CPU

Question: 5

ALU stands for

- (A) Algorithm and logical unit
- (B) Arithmetic and logical unit

(C) Arithmetic and logarithm unit

(D) Algorithm and logarithm unit

Ans: B

Arithmetic and logical unit
