Logically these are rules of conduct. Every country has laid down comprehensive series of practical rules for citizens for resolving mutual contradictory rights and interests. Most of these rules have been laid down to sustain social activities. For instance, many countries have laid down rules to protest against such unsocial activities as theft, attack and murder. These rules are backed by judicial system and executor institutions, which look after the people who obey the rules and also who violate the rules. Wherever the human behaviour is involved such rules are not only for namesake there but are necessary also.

Human beings are susceptible to violate rules.
