

FOC MCQ Questions and Answers Pdf

1. The minimum delay required between the initiation of two successive memory operations is known as

- a. memory cycle time
- b. memory access time
- c. transmission time
- d. waiting time

Ans: A

2. Ethernet uses

- a. bus topology
- b. ring topology
- c. star topology
- d. tree topology

Ans: A

3. An integrated circuit (IC) is

- a. fabricated on a tiny silicon chip
- b. a complicated circuit
- c. much costlier than a single transistor
- d. an integrating device

Ans: A

4. The term MIPS refers to

- a. millions of instructions per second
- b. multiple instructions per second
- c. megabytes of instructions per second
- d. millions input processor set

Ans: A

5. Which of the following best describes the term data processing?

- a. The collection of information or data
- b. The distribution of information or data
- c. The manipulation of information or data
- d. The storage of information or data

Ans: C

6. Keyboard is an

- a. input device

- b. memory device
- c. output device
- d. all of these

Ans: A

7. A physical connection between the microprocessor memory and other parts of the microcomputer is known as

- a. path
- b. address bus
- c. route
- d. all of these

Ans: B

8. The number of logical records in a physical record is

- a. Block
- b. Blocking factor
- c. Sector
- d. Field

Ans: B

9. Continuous line drawing are produced using

- a. chain printers
- b. daisy wheel printers
- c. Plotters
- d. thermal devices

Ans: C

10. Which of the following is non-impact printer?

- a. Drum printer
- b. Line printer
- c. Chain printer
- d. Laser printer

Ans: D
