

Multimedia Interview Questions for Experienced Pdf

Question: 1

What is Animation?

Animation is primarily used to illustrate or demonstrate an idea or a concept.

Unlike videos that are usually taken from life, animations are based on drawings.

Question: 2

What is morphing?

A technique by which we can blend two or more images to form a new image is called as morphing.

Question: 3

Define MIDI?

MIDI format or the Musical Instrument Digital Interface is one that is commonly used for transferring music information between electronic music devices like synthesizers and sound cards in computers.

Question: 4

What is warping?

The technique of distorting a single image to represent something else is known as warping.

Question: 5

What is pitch?

The distance between the crests of the wave is called as the pitch and also called frequency.

The greater the distance, the lower is the sound.
