

## Statement and Assumptions Questions Pdf

In each question below is given a statement followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumptions is implicit.

1. Statement :

The Government has decided to levy 2 percent on the tax amount payable for funding drought relief programmes.

Assumptions :

- I. The Government does not have sufficient money to fund drought relief programmes.
- II. The amount collected by way of surcharge may be adequate to fund these drought relief programmes.

Ans: E

Since a surcharge has been levied to fund drought relief programmes, it follows that the Government does not have sufficient money for the same. So, I is implicit. Besides, the percentage of surcharge must have been decided after studying the expected inflow in relation to amount of funds required. So, II is also implicit.

2. Statement :

Safety and health practices in many Indian companies are well below the international standards.

Assumptions :

- I. International standards of health and safety are ideal and unrealistic.
- II. Indian organizations do not consider safety and health management as their prime social responsibility.

Ans: B

The statement talks about the safety and health practices in Indian companies being far below international standards. It is clearly a criticism of Indian organizations not paying considerable attention to these aspects. So, II is implicit. The international standards demand perfection and are, in no way, non achievable. So, I is not implicit.

3. Statement :

“Private property, trespassers will be prosecuted” – A notice on a plot of land.

Assumptions :

- I. The passerby may read the notice and may not trespass.
- II. The people are scared of prosecution.

Ans: E

Any notice is displayed assuming that people will read the notice and also follow the content of the notice. So, I is implicit. Besides, the notice threatens any trespassers to be prosecuted. So, II is also implicit.

4. Statement :

It will be a substantial achievement in the field of education if one provides one school for every village in our country and enforce attendance.

Assumptions :

- I. Children in villages do not attend school regularly.
- II. Providing school to every village is desirable.

Ans: E

The statement lays stress on enforcing attendance. This implies that children in villages do not attend school regularly. So, I is implicit.

Besides, the statement calls one school for every village's substantial achievement. So, II is also implicit.

5. Statement :

As there is a great demand, every person seeking tickets of the programme will be given only five tickets.

Assumptions :

- I. The organizers are not keep on selling the tickets.
- II. No one is interested in getting more than five tickets.

Ans: D

Clearly, the organisers are adopting this policy not to reduce the sale but to cope up with great demand so that everyone can get the ticket.

So, I is not implicit. Also, due to great demand, the maximum number of tickets one person can get has been reduced to five. So, II is also not implicit.
