## Welding Metallurgy Quiz Questions and Answers Pdf

- 1. \_\_\_\_\_ based alloys are used as filler material in brazing.
  - a. Cadmium
  - b. Copper
  - c. Tin
  - d. None of these
    - Ans: B
- 2. Electrodes get consumed in \_\_\_\_\_ welding.
  - a. Thermit
  - b. Gas
  - c. Resistance
  - d. Arc
    - Ans: D
- 3. Oxy-acetylene welding mostly employs the \_\_\_\_\_ flame.
  - a. Oxidising
  - b. Reducing
  - c. Carburising
  - d. Neutral
  - Ans: D
- es.or 4. For welding aluminium in inert gas arc welding, we use
  - a. Combustible electrode and argon with alternating current
  - b. Non combustible electrode with helium and direct current
  - c. Straight polarity direct current
  - d. CO<sub>2</sub> and high speed Ans: A
- 5. In arc welding employing coated electrodes
  - a. Rod melts first and then coating melts
  - b. Which melts first depends on polarity
  - c. Coating melts first and then rod melts
  - d. Both rod and coating melts simultaneously Ans: a
- 6. TIG is especially useful in welding
  - a. Stainless steel
  - b. Cast iron
  - c. Aluminium
  - d. Titanium

Ans: C

- 7. Metal cutting is possible by oxy-acetylene flame through a gas torch due to the
  - a. Oxidation of metal

- b. Intensive oxidation
- c. Burning of metal
- d. Evaporation of metal Ans: B
- 8. A pool of molten metal is used in \_\_\_\_\_ arc welding.
  - a. MIG
  - b. TIG
  - c. Submerged
  - d. Carbon

Ans: C

- 9. Which of the following is the most suitable for joining two stainless steel foils of 0.1 mm thickness?
  - a. Electroslag welding
  - b. Gas welding
  - c. MIG welding
  - d. TIG welding

Ans: B

AIIS: B 10. Chromium molybdenum steel is generally not welded using \_\_\_\_\_ welding. a. Resistance b. Submerged arc c. Thermit d. Oxy-acetylene Ans: A
